The National Council of the National Jaion League, believing that this order may render imperiant services to the country, as well as the republican party, will continue to labor to that end, it is a well shown last that the League rendered important service to the country during the rebellion and the period of reconstruction. Now a new danger calls for our continued efforts. The ochocratic narty has seemed control of the house of representatives and the presidency by fraud and vicience and seeks to control the senants by socilar means. By fraud and vicience the Seath was made solidly democratic and tabeld solid.

How to secure a government of the people and trivitege of exching for each guited where the trivitege of exching the solid and vicience and seeks to control the senants by individual to the country of the people and the previous of the people and privitege of exching the seath of the solid drawn election, and having the result of the late of the providency. To accomplish that object it is important, if not necessary that the republican party shall control both houses of congress and the previdency. To accomplish that object it is important, if not necessary that the republican strength in the Southern states. How to strengthen the republican party is therefore a question of the first importance in the consideration of this question.

#### TAXATION OF CREDITS.

A correspondent, noting The Chegorian's protests against the taxation of credits, writes: 'Money is usually lent in Oregon at 10 per cent, and the average tax is not above 2 per cent. According to your reasoning, then, but for that two per cent, its this same money would be lent at 8 per cent. In other words, the lender cannot afford to realize less than 8 per cent, net profit on his money, to do which he is compelled to add the 2 per cent taxes to his 8 per cent, profit; all of which the borrower has to pay. That is your proposition, and it carries with it the conclusion that money cannot be prowith it the conclusion that money cannot be pro-fitably leaned in Oregon at less than 8 per cent."

That is not the proposition of THE ORSEON-LAN at all; and hence the writer's deduction from a proposition so erroneously stated is quite at fault.

But where the security is good, and where it can escape taxation, 6 or 7 per cent, is frequently and, indeed, generally accepted, and on large clear of an enarges or manning to charges, in to-garded as a good income for money; and when the security is good and no faxes are to be met, 5 per cent. is a good return on long loans in large same, like our Portland water honds.

bridges, and what not; to special school taxes, and if in an incorporated town or city to unforeseen taxation for municipal purposes. Hence he demands and will have a rate of interest high enough to cover not only the ordinary taxes but all these possible or probable contingencies. The element of doubt in the problem raises the interestiguite as much as the ordinary and calculable tax. In nothing is the old movest interesting and approximately their them. old proverb, ignotum pro magnifico, better il-Rot when the nuknown element is dropped out

of the problem, when the lender becomes as-sured that whatever income he bargains for is cured that whatever income he bargains for is to be a net income, sub, ect to no charges, the case is altered at once, and he is willing to accept a low rate because he knows it is a fixed and certain rate. In such conditions money, on the closest margins of calculation; and only in such conditions does the borroweriget the full henefit of such competition. At this moment there are very large aggregate sums of money lying in the banks of Portland inpen which the owners are receiving interest at the rate of only 4 per conf. per annum upon deposits for aix months. cent. per annum upon de posite for six months, and 5 or 6 per cent. per annum upon deposits for twelve months. Why do these situal lie there? Chiefly because the owners do upt what to subject their money to the chances of heavy taxation, and indeed will not do it. This money

How sharply this action in Billish Co-lumbia supplastives the diagrace of our own towns and the recreamy of government with us to the nytherlays of powering and distinguished. to the principles of humanity and civilization!

The utlerimage of the bosses to Washington with 'Skillin as representative of the "contin-gent" is the most significant thing looking to the future of politics in Oregon that has taken place in a long time. It portonds a "big deal," in which Mitchell and Hirsch are principale, in which succeed and girasca are principles, and looks to more complete completedom of ring power in the data, pased or rathway and other corporation he p, on the spoint of office and of legislation, and on the selfan personal ambition of those whose profession it is to work such things for all there is in than, Engagements are now to be made and plans.

perfected to go on with the role of the state against the will of the people. This pligrimage to Washington is an outward sign of things meditated within the ring's secret councils, and it will give direction to the course of politics in

for which she was executed in December, 1884, was convicted in September, 1885, and yet was not hanged until February, 1887, is an illustration of the law's delay in America that does not compare very fiatteringly with French (used the next November. In England justice is about as swift as in France, and in both countries the synthage are strictly private within tries the executions are strictly private, within the prison walks, in presence only of necessary officers. No reporters are present; no sensa-tional account of the prisoner's last hours is-given to the press, and in this way a certain amount of demonstrator publicity is avoided.

The Washington Sunday Herald quotes President Cleveland as saying: "Though I have tried to carry out the pledges of the democratic Flatform, I have made more enemies than friends in the party by doing so." Here is very high anthoxity for what The Cargonian has so often a sected, namely that there is no shoestly in the democratic party. On every question before the public at this time, from the tariff and civil

#### "THE BASIS OF TAX REFORM."

MACLEAY, Feb. 23.
To the Shitor of the Ormoonian:

To the Editor of the Origonian:
For years you have been a persistent and, indeed, a consistent advocate of certain amendments to our state laws reinting to assessment and taxation, which would be chiefly embolied in the exemption of credits from taxation and the non-allowance of the deduction of indensedness. In a recent aditorial, entitled "The Basis of Tax Reform," these two propositions were considered at some length; and, among other things, you say, speaking of the taxation of credits: "It makes the poor debtor pay a much higher interest rate, so as 'a cover the tax."

Now, are you say, speaking of the taxation of credits: "It makes the poor debtor pay a much higher interest rate, so as 'a cover the tax."

Now, are you sure that is so? Money is usually loaned in this state at 10 per cent. According to your reasoning, then, but for that 2 per cent. tax this sawe money would be loaned for 8 per cent. In other words, the lender cannot afford to realize less than 8 per cent. met profit on his money, to do which he is compelled to add the 12 per cent taxes to his 8 per cent. Profit—all of which the borrower has to pay.

That is your proposition, and it carries with it the conclusion hat money cannot be profitably leaned in Oregon at a less rate of interest than 8 per cent; for if it could, isnoers would not be forced to add the tax to the per cent. If it can be loaned for less, then the taxing of credits does not in any way prevent it, because if a man can reford to loun his money for 7 per cent. he could still and 2 per cent. But suppose he still execute 10 per cent. Per cent. But suppose he still execute 10 per cent. "each of or taxes and make his loan at 9 per cent. But suppose he still execute it and of-credits was not his sexues, or else it shows that he cannot afford to loan his money for less than 8 per cent. Editer action on the part of the money fender would seem to chow, therefore, that the law of taxing credits is not in the way of the reduction of interest.

worth of property escapes thannon in this case every year.

I have no means of knowing just now whether that state taxes credits, but it doesn't matter. If it does, then the fact that so much property escapes axation proves that the taxation of credits is no remedy for the evil we complain of; and if it does not, then that "great community of conspicuous experience in affairs of money and business" is guilty of the same "folly" that prevails so conspicuously in unfortunate oregon.

How do you account for these things: "These questions await answers."

mill at this point would save a long and costly drive.

There is some excitement here over the arrest to Puyallup last Friday of E. Buvall for the murder of a junan named Pichler. The crime was committed nearly three years ago in the Big Bottom country, some thirty or forty miles above here, and four or five men have been under arrest for it. Pichler was almost a stranger and had a calm near Duvall's house and was boarding with the latter. When found he had his throat cut and had been shot in the head, the ball coming out at the mouth. There was eriedned of a severe struggle, and the unfortunateman had a knife clenched in his hand, with which he evidently had been defending himself. Duvall was indicted for the crime by the grandjery two weeks ago, and it is said another must have been indicted for complicity. The indictment is said to have been procured mainly on testimony of two Indians, who have all the time shown great auxisty to have comebody hung. The county has offered a reward of \$300 for the arrest of the murderer, who no doubt committed the crime for money.

HEMADE HIMSELF COMFORTABLE.—Last week a young fellow known as Doc Johnsog was convicted in the police coart of vagrancy and senvicted in the police coart of vagrancy and senvicted in the police coart of vagrancy and senvicted in the police coart of vagrancy and senvice and the iron cages in the big cell of the city jall. This he decorated gorgeously with pictures, made a comfortable mattress out of some oid blankets and an oplum is mp out of a best bottle. He then obtained oplum and a pipe through means of Coou, a trusty, and was enjoying himself in true Oriental style until his cutiff was discovered by Capt. Farrell, who confiscated it and threw Johnson into a dark cell. Besides the oplum quite a quant ty of morphine, tobacco and other articles destined to cheer the lot of a criminal were found. Johnson is the fellow who was arrested some mouths ago for swindling a Chineman out of 320 on a forged check. He a short time previous bliked a man out of a double eagle by representing that he would engage him to work on a milk ranch. He, however, scaped just punishment in both of these cases on account of insufficiency of proof. Lest evening a young man named Chas. Campbell to whom Johnson has been writing letters to telling how he would the French leave when released, was arrested for vagrancy. His case will be called for trial to-day. Coon has likewise been locked up. HE MALE HIMSELF COMFORTABLE -- Last week

here as to the probable effect on the cattle market here of the severe losses on the Montana ranges this winter. It has been quite generally supposed that it would cause a great demand here for young cattle for restocking those ranges. But it now seems that the chances for a usit here of Montana buyers is rather poor. An Orresonan reporter has been shown a letter from a Massachusetts capitalist who has large stock interests in Montana, written to a stock man here. He says his foreman informs him that he has led 25 per cent. of native cattle and 50 per cent. of trail cattle, that is, cattle driven in over the trail from Texas or elsewhere. "It has been," he continues, "a ragular killing such as you had in Oregon in the winter of 1880-1. Cattle men in Montana are discouraged and for that they have had their ranges to heavily stocked." He declines an offer of young cattle and says there will be but few bought for the ranges in Montana. They will prefer to go slower and breed up slock which will stand the climate. There here as to the probable effect on the cattle man

RECOVEREN HALF PLOTAGE.—In the U.S. Circuit court yesterday, in the case of The Alcalde, Ganderson libellant, Judge Deady made a decree allowing the libellant the amount claimed and costs. Ganderson is a pilot who offered his services to the captain of The Alcalde when coming into the Columbia. His assistance was declined, probably with thanks, but Mr. Gunderson wanted the usual half pilotage allowed in such cases. The captain declined on the ground that Gunderson did not come of in a regulation pilot boat, or words to that atfect; that is to say, that he appeared in such questionable shape that he was not taked in. The judge held that so long as Gunderson "got there" it did not matter whether he went out in a cance or on a log, or whether he swam or waded out, so long as he was in the proper place to offer his corrieors as a pilot he was entitled to the customary half pilotage putd pilots whose services are declined.

TRIED SWEDENBORGIAN LECTURE. - Rev. John Doughty's third free lecture on the inc-trines of Swedenborg, delivered last night at the tabernote, was intended by a still larger au-dience than on previous occasions. The subject was, "The Nature of Spirit, or Man as a Spirit-nal Being." The lecturer essayed to show that was, "The Nature of Spirit, or Man as a Spiritmal Being." The tecturer essayed to show that
he sord or spirit was the real-man, and this
body only a temporary encisement for the purposes of its life on carth: that man is endowed
with a spiritual body, which, when at death the
earthly is dissolved, lives on forever, and that
this spiritual body is in perfect burnan form; endowed with all the senses of a man, and lives
hereafter a strictly human life in accordance
with the character be has formed to himself ou
earth. These views he enforced by a great variety of illustrations and by numerous quotations
from the scriptures. Mr. Doughty will controuch
his course by delivering this evering a lecture
upon "The True Doctrine of the Atonement."

Successions on First Deathers. SUGGESTION TO FISH DEALERS,-Now that many varieties, it is about time that fish desires were beginning to do se dealers in other cities do, dress the fish before sending them to a jountomer. When the supply of fish was scanty and precarious people took them as they could get them and paid what was asked. But those days are past and gone, and dealers can expect to increase sales only by making a more tempting display and by sending out orders in a fit étate for cooking. A man passing a market will much more likely to order some fish if he sees them properly cleaned and, if a mail, strung in banches, than he will if he sees them macked up in alime. What is needed here is a market such as is seen in all other dithes of this size, where dealers must make a nice display and put their fish on the market in proper shape in order many varieties, it is about time that fish dealer

DAMAGE FROM A BURST MAIN. - Yesterday atmilitee a bill from M. Beno & Co. for damages resulting from a burst main in Taylor street. Tuesday evening of lest week the water burst through a window and wet a of of goods in the rear, end of the store. Every item is set down, and the bill foots up \$452 75. One of the members of the committee | said that City Altorney Tanner had been consulted as to the liability of the city, and would give his opinion in a day or two. Another member said that Beno & Co. contributed to the scaldent by negligence. The main leaked badly early in the evening, but the firm did not notify the committee, so that the water could be shut off, Rome hours later the break became larger, and did the damage. Then the committee was notified

to shut the water off. The bill was referred to the auditing committee ESCAPED INSANE MAN RECAPTORED.—Monday's Orroganian contained an item concerning an insane immigrant named Wm! ### TWO POINTS IN REPLY.

PORTLAND, March 1.

IO THE EDITOR OF THE ORECOSTAN:

While thanking you for your clear and concise answer to "One who has joined the amendment league" in last Saturday's Origorian, I would like the privilege of commenting very briefly, upon a few points in your said answer. First—"The average man of intelligence dues not regard binuself hound to abstain from all ure of a thing that he finds, or fancies he finds, of some benefit or satisfaction to himself, he-cause come weaking or simpleton aburses it." I object to the two classes of "weakings" and "simpletons" being especially held up as the only persons who abuse the use of alcoholic

I object to the two classes of "weakings" and "simpletons" being especially held up as the only persons who abuse the use of alcoholic stimulants.

Many of the greatest men our country has produced have greatly abused its use, and only by the exertion of won-ertal will power, aided by the exertion of won-ertal will power, aided by the unwavering and powerful help of toother the officers of that incidious poleon which is found even in the "claret with their beaft-als." Sinch examples are numerous and names need not be mentioned.

Secondly—As to that large class of modernite but constant dinkers, who do not cutall wretcheness and misery upon themselves, there is much, very much to be said. The law of to legislitary trunsmission has been recognized for thousands of years, but its ratious causes have not been studied or understand until recert date. The fact has been demonstrated beyond depath that alcohol, through its great almost for brain and nerve tissue, is most potent in the transmission of hereditary diseance, especially those of a nervous type, such as placing and insanity. It is these same modernte drinkers, whose tables are always supplied with w.i.es. The class of near who never cease to be gentlemen. The lusbands, whose wives here taw them intexicated. These are the men who entail upon their off-spring many terrible hereditary weaknasses. Even the children of the periodical drunkard or "trute" who goes on a "spree," for a week or ten days at a time, are not so likely to suffer through this law of transmission as those of the moderate, constant drinker.

This truth is due to that "life-protecting principle" (as medicatir sature), which is ever ready to give hattle to any and every invaling foe. Again, this large class of molerate drinkers for whom you claim "personal rights," and who make up the better part of our American society, would, it they could be majo to see hely errors and responsibilities, gladly furged the personal rights," and who make up the better part of our American society, would, it th

To the Editor of the oscillatis mentioned in your local columns to-day, Lassed oil cake meal may be named as one of the best preventives for blind staggers. A small han ifol fed one or twice a day will keep off diseases of the directive organs, make the skin soft, hair smooth, and keep the animal in good condition. Oil horses that are worked continuously and fed on dry feed are especially liable to blind staggers, and as benefited by a small allowance of oil meat.

ROME, March 1.—The correspondent of the associated press in authorized to state that the American bishops take a favorable view of the organization known in the United States as the Kright's of Labor. Cardinal Gubbons has placed before the Vatican a formal statement as to the nature of the organization, and the attitude the church should adopt forward it. The cardinal says in this he cossiders any condemnation of the hights to be useless and highly inosportune, and might alknase, the sympathy of the American laboring classes from the clurch, and ham per the mission of the church to the laboring boor. In addition to the above positions the pringate treats alarmists' theories respective the lingsits of Jabor as puerite. He says that nearly one third of the men belonging to the organization are Catholics. Respecting the charpe that the essociation is secret, the cardinal says it is not a secret society in the sense condemned by the church, and it consequently is exempt from canonical censure. In Canada the case is different. Cardinal Gibbons further says that he cape the forganizations as well as the holights of Labor in the United States as not wholy barmiers, the rossibly beneficial as assisting in the proper relations between labor and capital.

JOHN F. HEJET & CO., New York.

FOR THE CURE OF FEVER and AGUE 3r CHILLS and FEVER, AND ALL MALARIAL DISEASES.

AND ALL MALARIAL DISEASES.

The proprietor of this celebrated medicine justity claims for it a superiority over all remedies ever offered to the public for the BAPE, CEECAIN, SPEEDY and FERMANERT curs of Ague and Fever, whether of short or long standing. He refers to the entire Western and Southern country to bear him testimony to the truth of the assortion that in no case whatever will it fail to cure if the directions are strictly followed and carried out. In a great many cases a single dose has been suffice ent for a cure, and whole families have been cured by a single bottle, with a perfect restoration of the general health. It is, how were, prudent, and in every base more extain to cure, if its use is continued in smaller doze for a week or two after the disease has been checked, more especially in difficult and long-standing cases. Usually this medicine will not require any sid to keep the bowels in good order. Should the patient, however, requires eathart medicine after having taken three or four losses of the Conic, a single doss of KENT'S VEGETABLE FAMILY PILLS will no sufficient. Use no other.
